

## Easy steps!

Just for you, we have prepared a video to guide you efficiently.\*

### 1. Support installation

- ✓ Determine the side of the chain system.
- ✓ Upgrade the support. Very important to avoid winding the wrong way.
- ✓ Secure the supports to the window frame using the two screws provided.

### 2. Canvas installation

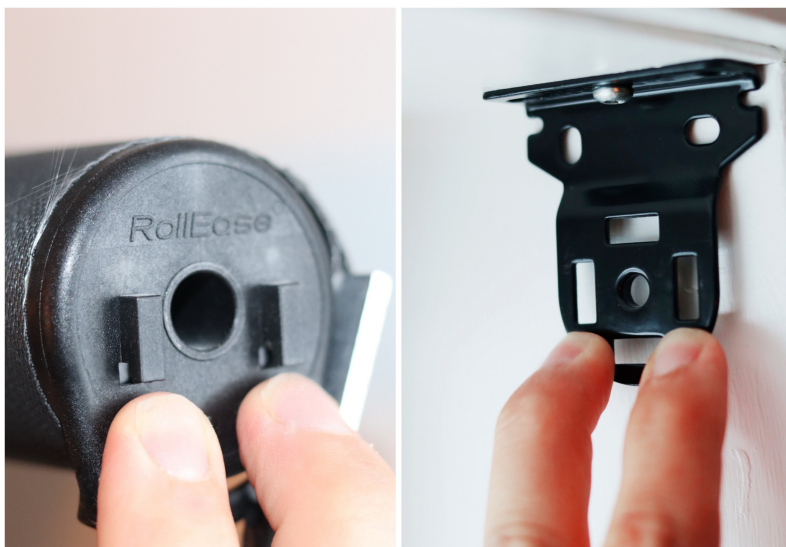

- ✓ Insert the spring into the support with only one hole in the center. See images below.

✔ Insert the two hooks at the end of the chain system into the two rectangular holes of the support and pull down.

✔ The bottom of the chain system should always point down should always point down, as shown in the illustration below.

## How to adjust the winding?

- ✓ In case the canvas winds to the right, correct the problem by removing the stop bead fixed to the chain.
- ✓ Unwind the canvas completely and place a piece of masking tape (several pieces may be needed) as close as possible to the left end of the roll.
- ✓ Replace the stop bead after the adjustment.
- ✓ In case the canvas winds to the left, correct the problem by the same process as above but by putting the tape on the right side.

**That's it!**
